📁 Work Experience

• Software Engineer @ 🐙 Greezli

September 2018 - Present

I am developing the Back-end part of the project in Python/Django web framework, and I am responsible for most tasks in the Front-end related to Bootstrap/jQuery/CSS. Developed the RestfulAPI with Django Rest Framework for the mobile application (iOS and Android) and third-party partners for interaction with the data warehouse. Wrote integration libraries for various payment providers (Paypal, Stripe), mailing list tools (Apsis, Mailchimp, Klaviyo), e-commerce (Shopify, Prestashop, WooCommerce), and custom POS integrations. Migrated from Heroku to Google Cloud and then to AWS (Amazon Web Services). Using Gitlab CI/CD with Ansible for testing and deployment of the project. Had small tasks in VueJS and AngularJS.

• Full-Stack Developer @ BuildingLink

August 2016 - January 2018

I have developed a building management website with Python/Django web framework. I was responsible for the Back-end, the Front-end, and the deployment of the project.

• Backend Developer @ Emlaktown

August 2014 - August 2016

I worked on a real estate listing website written in PHP/Symfony web framework. I was responsible for all integration tasks written in Python, the search toolkit (ElasticSearch, Python), and the AWS infrastructure. Created a cross-platform desktop application with the wxPython GUI library. I had 3 months of Project Management experience after the departure of our previous project manager from the company, and I have managed a team of 5 developers during that time.

• Software Engineer @ 🏠 metrekare

November 2013 - June 2014

It was my first work experience. I had tasks from all development teams for the first few months. I worked on the Restful API written in PHP/Symfony web framework, Single Page Application (SPA) Front-end written in NodeJS/BackboneJS, AWS services like EBS, CloudSearch, SQS, EC2, S3, and RDS. During my employment there, I also worked on writing Selenium test suit for the Front-end application in Python, and later in Ruby language, I have developed various tools in Python and C++. Later decided to focus on the Back-end (API) area and development of small libraries for various applications.

🗣️ Languages

English Russian Turkish Azerbaijani

💡 Skills

Python Django Flask Falcon JavaScript CSS Git
PostgreSQL MySQL Restful API CI/CD Ansible
Linux Administration GCP AWS Docker Redis Rust
Project Management

🎓 Education

Computer Engineering, Bachelor's Degree

İTÜ Istanbul Technical University

Istanbul/Turkey | 2012 - 2020

High School

School 48

Baku/Azerbaijan | 2001 - 2012

🤝 Volunteer Experience

Mozilla Representative

m Mozilla Organization

I have established a local community in Azerbaijan, organized a team for localization of Mozilla products like the Firefox browser, created community website and attended various Mozilla events. Made code contributions to multiple Mozilla projects.

April 2013 - Present

Ubuntu LoCo Azerbaijan

🐧 Canonical Ltd.

I am a Local Community manager since 2012, Localization admin in launchpad, created the community website. Was active until 2015, currently maintaining l10n group and the website.

March 2012 - Present

ITUGnu

🐛 Istanbul Technical University

ITU Software Freedom Club - I have established an official student club in university for promoting free software ideology, was a club president between 2014-2015, gave lectures on Python, Django, Git, Kivy and helped educating new staff members.

2013 - 2017
